

Student Enrollment & Course Management System (SECMS)

User Story

- The Student Enrollment & Course Management System (SECMS) is a Salesforce-based application developed to simplify the process of student registration, course selection, enrollment tracking, and academic administration.
- The system provides a centralized platform where students, enrollment staff, instructors, and administrators can manage academic information efficiently.

- It helps reduce manual work, avoid duplicate records, improve communication, and provide better visibility into enrollment activities.

INTRODUCTION

1.1 Project Overview

The Student Enrollment & Course Management System is designed to bring student, course, and enrollment information together in a single Salesforce environment. The system supports important activities such as student registration, course availability, enrollment processing, instructor allocation, payment tracking, and approval management.

By using Salesforce features such as Flows, Validation Rules, Approval Processes, Reports, and Dashboards, the system can automate repetitive tasks and maintain accurate academic records. Administrators can monitor enrollment activities, while enrollment officers can process student registrations and course requests more efficiently.

1.2 Purpose

- The main purpose of SECMS is to and automated as olution for managing student enrollment and course-related activities.

The system aims to provide:

- Easy management of student information
- Organized course registration
- Faster enrollment processing
- Proper instructor assingment.
- Automated approval and validation
- Secure maintenance of academic records
- Real-time reports and dashboards
- Better coordination between students and staff.

2.IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Enrollment Officer	manage student enrollments efficiently	enrollment data is scattered	systems are manual and unintegrated	frustrated and error-prone
PS-2	Administrator	track enrollments and revenue	reporting is delayed	data is not centralized	uncertain in decision-ma king

2.1 Empathy Map Canvas

User Personal: Enrollment Officer
Think & Feel

- Wants to complete registrations accurately
- Wants to avoid duplicate student records
- Feels concerned when enrollment information is incomplete

Hear

- Students asking about course availability
- Instructors requesting enrollment information
- Administrators asking for enrollment reports

See

- Student registration details
- Course lists and available seats
- Pending enrollment requests

Say & Do

- Verifies student information
- Processes enrollment requests
- Communicates with students and instructor

Brainstorming & Idea Prioritization

Step 1 – Ideas

- Student Registration
- Online Course Enrollment
- Enrollment Tracking
- Academic Management
- Salesforce Enrollment
- System

Step 2 – Grouping

- Manual: Paper forms,
- Spreadsheets Automated:
- Online registration, Course management
- Cloud-Based: Salesforce SECMS

Step 3 – Prioritization Salesforce SECMS was selected to manage students, courses, enrollments, approvals, and reports in one platform

2. IDEATION PHASE

2.2 Empathy Map Canvas

User Persona: Enrollment Officer

2.3 Brainstorming & Idea Prioritization

1 Step 1 – Brainstormed Ideas

- Spreadsheet automation
- Standalone enrollment portal
- ERP integration
- Salesforce-based enrollment system

2 Step 2 – Grouping

- Manual solutions
- Semi-automated solutions
- Fully automated cloud solutions

2.3 Brainstorming & Idea Prioritization – Student Enrollment & Course Management System (SECMS)

3.REQUIREMENT ANALYSIS PHASE

- Awareness & Registration–Student registration and awareness
- Course Selection – Choosing the required course
- Enrollment Request – Submitting enrollment request
- Fee Payment – Paying the course fees
- Approval – Request approval process
- Instructor Assignment – Assigning an instructor to the student

Functional Requirements

FR-1: Student Management – Manage student records.

FR-2: Course Management – Create and manage courses.

FR-3: Enrollment Processing – Request, approve, and reject enrollments.

FR-4: Instructor Assignment – Automatically assign instructors.

Non-Functional Requirements

NFR-1: Usability – The system should be simple, user-friendly, and easy to navigate.

NFR-2: Performance – The system should requests respond quickly and process efficiently.

NFR-3: Security – Student and course data should be protected from unauthorized access.

NFR-4: Reliability – The system should work consistently with minimal failures or downtime.

NFR-5: Scalability – The system should support an increasing number of students, courses, and instructors.

Data Flow Diagram

4.PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

4.2 Proposed Solution – Functional Requirements

- Parameter: Problem
- Description: Manual enrollment handling and time-consuming administrative processes.
- Parameter: Solution
- Description: Salesforce-based SECMS for managing students, courses, enrollments, payments, and approvals.

- Parameter: Novelty
- Description: End-to-end automation of course student enrollment and the management process.
- Parameter: Social Impact
- Description: Improves student experience through faster processing and transparent enrollment.

4.3 Solution Architecture

5.PROJECT PLANNING AND SCHEDULING

5.1 Project Planning

- Agile Methodology – The project follows an Agile approach to support flexible development and continuous improvement.
- Epics → Stories → Story Points – Project requirements are divided into epics, user stories, and story points to estimate the effort required.
- Sprint-Based Execution – Development activities are completed in short sprints, with each sprint focusing on specific features and tasks.
- Velocity Calculation – Team velocity is measured based on completed story points and used to estimate the work that can be completed in upcoming sprints.
- Progress Tracking – Sprint reviews and regular updates are used to monitor project progress and identify pending tasks.

6. Project Development

Phase: Project Flow:

- Milestone 1: Salesforce Developer Account Creation
- Milestone 2: Custom Object Creation (Student, Course, Enrollment, Instructor)
- Milestone 3: Tabs Creation.
- Milestone 4: Lightning App Creation
- Milestone 5: Fields Creation
- Milestone 6: Create Relationships v
- Milestone 7: PageLayout Customization
- Milestone 8: Validation Rules
- Milestone 9: Flows (Automation)
- Milestone 10: Approval Process
- Milestone 11: Reports
- Milestone 12: Dashboards
- Milestone 13: Security Setup
- Milestone 14: Conclusion

Milestone 1 – Salesforce Introduction

Introduction:

Salesforce is a cloud-based platform used to manage business processes, customer information, and organizational activities. It provides various tools that help organizations store data, automate tasks, and improve overall productivity.

In this milestone, we learn the basic concepts of Salesforce, its main features, and how the platform can be used to build and manage applications.

We also explore important Salesforce components such as Objects, Records, Fields, Automation, Reports, and Dashboards. This milestone provides a strong foundation for using Salesforce in the Student Enrollment & Course Management System (SECMS).

What Is Salesforce?

Salesforce helps is a cloud-based CRM platform that organizations manage their data, processes, and interactions in one place. It provides tools for storing information, automating tasks, tracking activities, and generating reports.

Salesforce allows users to access their work from anywhere through the cloud. It also supports data management, workflow automation, dashboards, and secure information storage.

For the SECMS project, Salesforce can be used to manage student details, courses, enrollment requests, instructor assignments, approvals, and reports efficiently.

Activity 1: Creating Developer Account: Creating a developer org in salesforce.

Go to

On the sign up form, enter the following details

The screenshot shows the Salesforce Developer Edition sign-up page. On the left, there's a blue sidebar with the text "Build for the Agentic Enterprise. Sign up for your Developer Edition." and a list of features: "Build AI agents with Agentforce, grounded in your data with Data 360", "Connect Claude Code, Cursor, or Codex to your org with hosted MCP", "Build in the browser with the Agentforce Vibes IDE - no setup required", and "Drag-and-drop when you want it, Apex when you need it". The main content area is white and contains the sign-up form. The form title is "Sign up for your Developer Edition" with a subtitle "A free Salesforce Platform environment with Agentforce and Data 360". The form fields are: First name (Khushiya), Last name (Rahman T), Job title (Developer), Company (Islamlah Women's arts & S...), Country/region (India), and Work email (khashiya1144@gmail.com). Below the form, there's a checkbox for "I agree to the Main Services Agreement - Developer Services, Salesforce Program Agreement, and API Terms of Service". At the bottom, there's a disclaimer about the free trial and a link to the Privacy Statement.

**Build for the Agentic Enterprise.
Sign up for your Developer Edition.**

The entire Salesforce platform - exposed as APIs, MCP tools, and CLI commands. Build apps, ship agents, and let coding agents do the heavy lifting with Salesforce Headless 360.

- ✓ Build AI agents with Agentforce, grounded in your data with Data 360
- ✓ Connect Claude Code, Cursor, or Codex to your org with hosted MCP
- ✓ Build in the browser with the Agentforce Vibes IDE - no setup required
- ✓ Drag-and-drop when you want it, Apex when you need it

Sign up for your Developer Edition
A free Salesforce Platform environment with Agentforce and Data 360

First name: Khushiya ✓ Last name: Rahman T ✓
Job title: Developer ✓ Company: Islamlah Women's arts & S... ✓
Country/region: India ✓ Work email: khashiya1144@gmail.com ✓

☒ I agree to the [Main Services Agreement - Developer Services](#), [Salesforce Program Agreement](#), and [API Terms of Service](#)

Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.

I acknowledge, as described in the Developer Documentation, (1) the Developer Edition includes autonomous and other generative AI features, and (2) Salesforce may limit use of those features and the org, and may terminate any org that has been inactive for 45 days.

We value your privacy. To learn more, visit our [Privacy Statement](#).

First Name: [Your First Name]

Last Name: [Your Last Name]

Email: [Your Email ID]

Role: Developer

Company : CollegeName

County : India

Postal Code : pin code

Username :

Click on sign me up after filling these.

Activity 2:

Account Activation:

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account

3. Give a password and answer a security question and click on change password.

khashiya1144.ec77df830f78@agentforce.com. Make sure to include at least:

- ✓ 8 characters
- ✓ 1 letter
- ✓ 1 number

* New Password

..... Good

* Confirm New Password

..... Match

* New Security Question

▼ What was your childhood nickname?

* New Answer

khashi
..... Good

*=required

4. Then you will redirect to your salesforce setup page.

To create the the student custom object:

- Go to Setup in Salesforce.
- Click on Object Manager.
- Click Create → Custom Object.

Enter the details as below:

- Label → Student
- Plural Label → Students
- Object Name → Student
- Record Name → Student Name
- Data Type → Text
- Optional Features → Select Allow Reports, Allow Activities.
- Search Status → Select Allow Search
- Click Save

- Track Field History (optional, if you want)

when referenced via the API: Record Name: Example: Account Name

Data Type: Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.

Optional Features

- ☒ Allow Reports
- ☒ Allow Activities
- ☒ Track Field History
- ☐ Allow in Chatter Groups
- ☐ Enable Licensing

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more.](#)

- ☒ Allow Sharing
- ☒ Allow Bulk API Access
- ☒ Allow Streaming API Access

Deployment Status [What is this?](#)

- And Select Allow Search
- Click Save button

Search Status [What is this?](#)

When this setting is enabled, your users can find records of this object type when they search. [Learn more.](#)

☒ Allow Search

Object Creation Options (Available only when custom object is first created)

- ☐ Add Notes and Attachments related list to default page layout
- ☐ Launch New Custom Tab Wizard after saving this custom object

- Next, enter the details
- Label → Course
- Plural Label → Courses
- Object Name → Course
- Record Name → Course Name
- Data Type → Text
- Optional Features → Select Allow Reports, Allow Activities, Track Field History (optional)

Setup Home Object Manager

SETUP New Custom Object

New Custom Object

Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles. [Tell me more](#) [Don't show this message again](#)

Next ,

- Label → Instructor
- Plural Label → Instructors
- Object Name → Instructor
- Record Name → Instructor Name
- Data Type → Text
- Optional Features → Select Allow Reports, Allow Activities, Track Field History (optional)

The screenshot shows the 'New Custom Object' setup page in Salesforce. The 'Custom Object Information' section is active, showing fields for 'Label' (Instructor), 'Plural Label' (Instructors), 'Object Name' (Instructor), and 'Description'. A yellow banner at the top states: 'Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles. [Tell me more!](#) [Don't show this message again](#)'. Buttons for 'Save', 'Save & New', and 'Cancel' are visible.

- Search Status → Select Allow Search
- Click Save

The screenshot shows the 'New Custom Object' setup page in Salesforce, continuing from the previous section. The 'Optional Features' section is active, showing checkboxes for 'Allow Reports', 'Allow Activities', 'Track Field History', 'Allow in Chatter Groups', and 'Enable Licensing'. The 'Object Classification' section is also visible, showing checkboxes for 'Allow Sharing', 'Allow Bulk API Access', and 'Allow Streaming API Access'. The 'Record Name' field is set to 'Instructor Name' and the 'Data Type' is set to 'Text'. A warning message states: 'Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.' The 'Deployment Status' section is partially visible at the bottom.

The screenshot shows the 'New Custom Object' page in Salesforce Setup. The page has a search bar at the top and a navigation menu with 'Setup', 'Home', and 'Object Manager'. The main content area is titled 'New Custom Object' and includes several sections: 'Allow Sharing' (checked), 'Allow Bulk API Access' (checked), 'Allow Streaming API Access' (checked), 'Deployment Status' (radio buttons for 'In Development' and 'Deployed', with 'Deployed' selected), 'Search Status' (checkbox for 'Allow Search' is checked), and 'Object Creation Options' (checkboxes for 'Add Notes and Attachments related list to default page layout' and 'Launch New Custom Tab Wizard after saving this custom object'). At the bottom are 'Save', 'Save & New', and 'Cancel' buttons.

Next ,

- Label → Enrollment
- Plural Label → Enrollments
- Object Name → Enrollment
- Record Name → Enrollment Name
- Data Type → Text
- Optional Features → Select Allow Reports, Allow Activities, Track Field History (optional)

The screenshot shows the 'New Custom Object' page in Salesforce Setup, specifically the 'Custom Object Definition Edit' section. The page has a search bar at the top and a navigation menu with 'Setup', 'Home', and 'Object Manager'. The main content area is titled 'New Custom Object' and includes a message about permissions. The 'Custom Object Information' section contains fields for 'Label' (Enrollment), 'Plural Label' (Enrollments), 'Starts with vowel sound' (unchecked), 'Object Name' (Enrollment), and 'Description'. Examples are provided for each field: 'Account' for Label and Object Name, and 'Accounts' for Plural Label. At the bottom are 'Save', 'Save & New', and 'Cancel' buttons.

- Search Status → Select Allow Search
- Click Save

Setup Home Object Manager

SETUP New Custom Object

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called when referenced via the API.

Record Name: Example: Account Name

Date Type: Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.

Optional Features

Milestone 4 – Create Relationships:

Activity 1: Create Lookup from Enrollment to Student:

Steps:

- Go to Setup → Object Manager.
- Search Enrollment → open Enrollment__c object.
- Click Fields & Relationships → New.
- Select Lookup Relationship → Next.

- For Related To, select Student__c → click Next.
- Enter Field Label: Student (API Name: Student__c).
- Click Next through Field-Level Security and Layout options
- click save

Setup - Object Manager - Enrollment

New Relationship

Step 3. Enter the label and name for the lookup field

Field Label:

Field Name:

Description:

Help Text:

Child Relationship Name:

Required: ☐

Always require a value in this field in order to save a record: ☐

What to do if the lookup record is deleted? ☒ Clear the value of this field. You can't choose this option if you make this field required.

Activity 2: Create Lookup from Enrollment to Course

Purpose: To link each Enrollment to a Course.

Steps:

- Go to Setup → Object Manager → Enrollment__c.
- Click Fields & Relationships → New.
- Select Lookup Relationship → Next.
- For Related To, select Course__c → Next.
- Enter Field Label = Course (API Name: Course__c).
- Click Next (set visibility and layout) → Save.

Setup - Object Manager - Enrollment

New Custom Field

Step 1. Choose the field type

Specify the type of information that the custom field will contain.

Data Type

☐ None Selected

☐ Auto Number

☐ Formula

☐ Roll-Up Summary

☒ Lookup Relationship

☐ Master-Detail Relationship

Select one of the data types below.

A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.

Activity 3: Create Lookup from Enrollment to Instructor

- Go to Setup → Object Manager → Enrollment__c.
- Click Fields & Relationships → New.
- Choose Lookup Relationship → Next.

- For Related To, select Instructor_c → Next.
- Enter Field Label = Instructor (API Name: Instructor_c).
- Complete Field-Level Security and Page Layout options
- Click Save.

The screenshot shows the Salesforce Setup interface. The left sidebar has a menu with options: Details, Fields & Relationships (selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled 'Enrollment' and 'New Relationship'. It shows 'Step 2. Choose the related object' with a dropdown menu for 'Related To' set to 'Instructor'.

The screenshot shows the 'Step 3. Enter the label and name for the lookup field' section. It includes input fields for 'Field Label' (Instructor), 'Field Name' (Instructor), 'Description', and 'Help Text'. Below these is the 'Child Relationship Name' field set to 'Enrollments'. There are checkboxes for 'Required' (Always require a value in this field in order to save a record) and 'Clear the value of this field. You can't choose this option if you make this field required.'.

The screenshot shows the 'Specify the title that the related list will have in all of the layouts associated with the parent.' section. It includes a 'Related List Label' field set to 'Enrollments'. Below this is a section for 'Add Related List Page Layout Name' with a checkbox for 'Instructor Layout' and a checkbox for 'Append related list to users' existing personal customizations'.

Milestone 5 – Validation Rules:

Activity 1: Student Email Domain Validation

Steps:

- Go to Setup → Object Manager → Student __c.
- Click Validation Rules → New.
- Rule Name → Student_Email_Domain_Validation.
- Error Condition → Email must contain @student .edu.
- Error Message → Email must be a valid student institutional email.
- Error Location → Field → Email__c.
- Click Save.

Activity 2: Fees Must Be Paid Before Approval

Steps:

- Go to Setup → Object Manager → Enrollment__c.
- Click Validation Rules → New.
- Rule Name → Fees_Must_Be_Paid_Before_Approval.
- Error Condition → Enrollment Status = Approved AND Fees Paid False.
- Error Message → Fees must be paid before approving an enrollment.
- Error Location → Top of Page (or field as needed).
- Click Save.

Milestone 6 – Approval Process

Activity1: CreateApprovalProcessforEnrollmentRequests

Steps:

- Go to Setup → Approval Processes.
- Select Enrollment__c object.
- Click Create New Approval Process → Use Standard Setup.
- Enter Process Name: Approval_Enrollment_Request.
- Set Entry Criteria: Enrollment_Status__c = "Requested".
- Save and configure approval steps (assign to Training Manager).

- Add Approval Step:
- Approver: specific Training Manager user.

Activity 2: Creating Remaining Tabs

- Go to Setup.
- In the Quick Find box, type Tabs.
- Under Custom Object Tabs, click New.
- Select Course from the object list → choose a tab style (icon) → click Next, assign to all profiles, then Save.

The screenshot shows the Salesforce Setup interface. The left sidebar has a search bar with "tabs" entered. The main content area is titled "New Custom Object Tab" and is on "Step 1 of 3: Enter the Details". The instructions say: "Choose the custom object for this new custom tab. Fill in other details." The form includes a dropdown for "Select an existing custom object or create a new custom object", a "Tab Style" dropdown with "Course" selected, and a "Description" text area. The "Next" button is at the bottom right.

The screenshot shows the "New Custom Object Tab" page on "Step 2 of 3: Add to Profiles". The instructions say: "Choose the user profiles for which the new custom tab will be available. You may also examine or alter the visibility of tabs from the detail and edit pages of each profile." There are two radio buttons: "Apply one tab visibility to all profiles" (selected) and "Apply a different tab visibility for each profile". Below is a table with a list of profiles and a "Tab Visibility" column.

Profile	Tab Visibility
Analytics Cloud Integration User	Default On
Analytics Cloud Security User	Default On
Anypoint Integration	Default On
Authenticated Website	Default On
Authenticated Website	Default On
B2B Reordering Portal Buyer Profile	Default On
Contract Manager	Default On
Cross Org Data Proxy User	Default On
Custom Marketing Profile	Default On
Custom Sales Profile	Default On
Custom Support Profile	Default On

Next ,

- Go to Setup.
- In the Quick Find box, type Tabs.
- Under Custom Object Tabs, click New.
- Select Instructor from the object list.
- Choose a tab style (icon).
- Click Next, assign it to all profiles, then click Save.

Next ,

- Go to Setup.
- In the Quick Find box, type Tabs.
- Under Custom Object Tabs, click New.
- Select Enrollment from the object list.
- Choose a tab style (icon).
- Click Next, assign it to all profiles, then click Save.

The screenshot shows the Salesforce Setup interface. The left sidebar has a search bar with "tabs" entered. The main content area is titled "New Custom Object Tab" and is on "Step 1 of 3: Enter Tab Details". The instructions say: "Choose the custom object for this new custom tab. Fill in other details." The form includes a dropdown for "Select an existing custom object or [create a new custom object](#)" with "Enrollment" selected. Below it is a "Tab Style" dropdown with "None" selected. An optional section for "Choose a Home Page Custom Link to show as a splash page the first time your users click on this tab" has a "Splash Page Custom Link" dropdown also set to "None". There is a text area for "Enter a short description" and a "Description" label. At the bottom right are "Next" and "Cancel" buttons.

The screenshot shows the same Salesforce Setup interface, now on "Step 2 of 3: Add to Profiles". The instructions say: "Choose the user profiles for which the new custom tab will be available. You may also examine or alter the visibility of tabs from the detail and edit pages of each profile." There are two radio button options: "Apply one tab visibility to all profiles" (which is selected) and "Apply a different tab visibility for each profile". Below these is a table with two columns: "Profile" and "Tab visibility".

Profile	Tab visibility
Analytics Cloud Integration User	Default On
Analytics Cloud Security User	Default On
Appoint Integration	Default On
Authenticated Website	Default On

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Custom Object Tab	Tab Style	Description
Action: Edit Delete Edit: Del Quota360 Edit: Del Enrollments Edit: Del Institutions Edit: Del Students	New What's This? ☒ Classic ☐ Modern ☐ Trends ☐ Apparent	
Web Tab New What's This? No Web Tabs have been defined		
Visualforce Tab New What's This? No Visualforce Tabs have been defined		
Lightning Component Tab New What's This?		

Milestone 8 - The Lightning App

Activity 1: Creating the Lightning Application for the Project

Steps:

- Go to Setup.
- In the Quick Find box, type App Manager.
- Click New Lightning App.
- Enter App Name: Student Enrollment & Course Management (Developer Name auto-fills, Description optional).
- Click Next → choose App Branding (optional logo/color theme).
- Select Navigation Style: Standard Navigation.
- Click Next → assign the app to profiles (Admin, Enrollment Officer, Instructor).
- Click Next → add tabs:
 - Student
 - Course
 - Instructor
 - Enrollment
 - Reports
 - Dashboards
 - Home
 - Tasks
- Click Next → review app settings.
- Click Save & Finish.

Milestone 9 – Page Layouts and Record: Activity 1: Create Record Types for Enrollment:

- Go to Setup → Object Manager → Enrollment__c.
- Click Record Types → New.
- For the first record type:
 - Existing Record Type: Master
 - Record Type Label: New Enrollment
 - Enable for required profiles (Admin, Enrollment Officer)
 - Select the default Page Layout → Save & New
- For the second record type:
 - Record Type Label: Re-Enrollment
 - Enable for same profiles
 - Select the default Page Layout → Save

Step 1 of 2

Enter a name and description for the new record type. The new record type will include all the picklist values from the existing record type selected below. After saving the new record type, you will be able to customize the picklist values.

Record Type

Existing Record Type: Master

Record Type Label: New Enrollment

Record Type Name: New_Enrollment

Description:

Active: ☒

Select Make Available to give users assigned to this profile the ability to create and clone records of this record type, or assign this record type to existing records. To make the new record type the default for a profile, select Make Default. Users assigned to this record type can still view and edit records associated with record types not available for their profiles.

Profile Name	Record Types Currently Available	Make Available	Make Default
Analytics Cloud Integration User		☐	☐
Analytics Cloud Security User		☐	☐
Anypoint Integration		☐	☐

Activity 2: Separate Page Layouts for Each Enrollment Record Type
 Purpose: Show different fields for New Enrollment vs Re-Enrollment.
 Steps:

- Go to Setup → Object Manager → Enrollment__c → Page Layouts.
- Click New → create layout for New Enrollment.
- Clone from existing Enrollment Layout.
- Name = New Enrollment Layout → Save.
- Keep fields relevant for first-time enrollment:
- Student, Course, Instructor, Enrollment Date, Status, Fees, Comments.
- Remove unnecessary Re-Enrollment fields (if any).
- Click Save.

Again, click New to Create Re-Enrollment Layout

Steps:

- Open Enrollment_c → Page Layouts and select New.
- Choose an existing Enrollment Layout as the template and name the new layout Re-Enrollment Layout.
- Add relevant fields such as Previous Enrollment, Re-Enrollment Reason, Status, Fees, and other required details.
- Remove fields that are not needed for the re-enrollment process.
- Click Save to complete the layout.

- .Click Page Layout Assignment → Edit Assignment.
- For each profile and record type:
- New Enrollment → use New Enrollment Layout.
- Re-Enrollment → use Re-Enrollment Layout.
- Click Save.

Activity 3: Enrollment R Addelated Lists to Parent Objects:

Steps:

a) Student → Enrollment Related List

- Go to Setup → Object Manager → Student__c → Page Layouts.
- Open the main layout.
- In the palette, select Related Lists.
- Drag Enrollments related list onto the layout.
- Customize columns if needed → Save.

b) Course → Enrollment Related List

- Go to Object Manager → Course__c → Page Layouts.
- Open the layout.
- Add Enrollments related list.
- Click Save.

c) Instructor → Enrollment Related List

- Go to Object Manager → Instructor__c → Page Layouts.
- Open the layout.
- Add Enrollments related list.
- Click Save.

Student → Enrollment Related List:

Course → Enrollment Related List :

Instructor → Enrollment Related List :

Milestone 10 – Automation with Flow

Activity1: Auto-Populate EnrollmentDate(Record-Triggered Flow)

Steps:

- Open Setup and navigate to Flows → click New Flow.
- Choose Record-Triggered Flow and select Create.
- Set the target object as Enrollment__c.
- Configure the flow to run when a new Enrollment record is created.
Select Actions and Related Records under optimization, then click Done.

Update Enrollment Date Automatically:

Add an Update Records element to the flow.

Set the element label as Set Enrollment Date.

Select the record that triggered the flow for updating.

Choose the field Enrollment_Date__c.

Set its value to \$Flow.CurrentDate.

This automatically stores the current date in the Enrollment Date field.

Save as SetEnrollmentDate → Activate.

Activity 2: Send Email When Enrollment Approved

- Create an Email Template and Email Alert to inform the student about approval.
- Go to Setup → Flows → New Flow.
- Select Record-Triggered Flow and choose Enrollment__c.
- Set the trigger to run when an enrollment record is updated.
- Add the condition Enrollment_Status__c = "Approved".
- Configure the flow to send the email notification, alert the Admin, and update the Student status to Active.

Add Get Records to fetch related Student__c.

Add Action (Email Alert) to send email to student.

Add Action to notify Admin if needed.

Add Update Records to set Student__c.Status__c = "Active".

Save as Enrollment Approved Action → Activate.

Activity 3: Auto-Assign Instructor Based on Course Category

Rules:

- Technical → Instructor A
- Language → Instructor B
- Non-Technical → Instructor C

Steps:

- Prepare Instructor__c records with codes (e.g., INSTR_A, INSTR_B, INSTR_C).
- Go to Setup → Flows → New Flow → choose Record-Triggered Flow.
- Object = Enrollment__c, Trigger = Created or Updated.
- Add Get Records → fetch related Course__c (use Enrollment__c.Course__c).
- Add Decision element → check Course__r.Category__c.
- Outcome 1: Technical
- Outcome 2: Language
- Outcome 3: Non-Technical
- For each outcome:
- Add Get Records → fetch Instructor record (A/B/C) using code or name.
- Add Update Records → set Enrollment__c.Instructor__c = Get_Instructor_X.Id.
- Name Flow = AutoAssign_Instructor → Save & Activate.

Activity 4: Auto-Create Task for Follow-Up

Purpose: When Enrollment is “Requested”, create a follow-up task for Admin.

Steps:

- Go to Setup → Flows → New Flow → choose Record-Triggered Flow.
- Object = Enrollment__c, Trigger = Created or Updated.
- Set Condition: Enrollment_Status__c = "Requested".

- Add Get Records → fetch Admin user (by Username or Profile).
- Add Formula Resource → TODAY() + 2 (for due date).
- Add Create Records → Task.
- Subject: Follow up on enrollment request
- OwnerId: Admin user Id
- WhatId: Enrollment Id
- ActivityDate: Formula (Today + 2)
- Name Flow = Create_Followup_Task → Save & Activate.

Milestone 11 – Reports:

Activity1:Create “Students by Status”Report

- Go to Reports → New Report.
- Select Report Type = Students.
- In Outline, group rows by Status__c.
- Add columns → Name, Email, Phone (and any others you need).
- Click Save → name it Students by Status.

The screenshot shows the Salesforce Reports interface for a report titled "Students by Status". The report is based on the "Students" object and is grouped by "Student Status". The report shows 5 total records. The columns displayed are "Student: Student Name", "Email", and "Phone". The data is organized into two groups: "Active (3)" and "Not Active (2)".

Student Status	Student: Student Name	Email	Phone
Active (3)	hanya	-	-
	ghanalakshmi	-	-
	Aha	-	-
Subtotal			
Not Active (2)	Iskra	-	-
	fakiya	-	-
Subtotal			
Total (5)			

At the bottom of the report, there are checkboxes for "Row Counts", "Detail Rows", "Subtotals", and "Grand Total", all of which are checked.

Activity 2: Create “Enrollments by Course” Report

- Go to Reports → New Report.
- Select Report Type = Enrollments.
- In Outline, group rows by Course__r.Name.
- Add Record Count column → shows total per Course.
- Click Save → name it Enrollments by Course.

The screenshot shows the Salesforce Reports interface for a report titled "Enrollments by Course". The report is based on the "Enrollments" object and is grouped by "Course__r.Name". The report shows 5 total records. The columns displayed are "Enrollment: Enrollment Name" and "Total Revenue". The data is organized into three groups: "Business English (2)", "Project Management (1)", and "Salesforce Admin Course (2)".

Course	Enrollment: Enrollment Name	Total Revenue
Business English (2)	Get Cloudy	-
	Total Revenue	-
Subtotal		
Project Management (1)	Enrollment Approved - Student Notification	-
Subtotal		
Salesforce Admin Course (2)	Test Enrollment	-
	Test Student	-
Subtotal		
Total (5)		

At the bottom of the report, there are checkboxes for "Row Counts", "Detail Rows", "Subtotals", and "Grand Total", all of which are checked.

Activity 3: Create “Pending Enrollment Approvals” Report

- Go to Reports → New Report.
- Select Report Type = Enrollments.
- Add Filter: Enrollment_Status__c = "Requested".
- Add columns → Student, Course, Owner, Created Date.
- Click Save → name it Pending Enrollment Approvals.

The screenshot shows the Salesforce Reports interface for a report titled "Pending Enrollment Approvals". The report type is "Enrollments". The table displays 3 records with columns: Enrollment: Enrollment Name, Student, Course, Enrollment: Owner Name, and Enrollment: Created Date.

	Enrollment: Enrollment Name	Student	Course	Enrollment: Owner Name	Enrollment: Created Date
1	Test Enrollment	-	Salesforce Admin Course	Ahla Tahmeen k.s	9/23/2026
2	Total Revenue	-	Business English	Ahla Tahmeen k.s	9/23/2026
3	Enrollment Approved - Student Notification	-	Project Management	Ahla Tahmeen k.s	9/23/2026

Activity 4: Create “Revenue Report (Fees Paid)” Report

- Go to Reports → New Report.
- Select Report Type = Enrollments.
- Add Filter: Fees_Paid__c = TRUE.
- Group rows by Course_r.Name.
- Add Summary field → Course_Fee__c (or similar fee field).
- Click Save → name it Revenue Report – Fees Paid.

The screenshot shows the Salesforce Reports interface for a report titled "Revenue Report". The report type is "Enrollments". The table displays grouped data by Course, with columns: Enrollment: Enrollment Name, Course, Total Amount, Enrollment Date, Enrollment Status, and Fees Paid. Summary rows are shown for each course group.

Enrollment: Enrollment Name	Course	Total Amount	Enrollment Date	Enrollment Status	Fees Paid
Enrollment Approved - Student Notification (1)	Project Management (1)	\$6,000	9/23/2026	Requested	☒
Subtotal		\$6,000			1
Total		\$6,000			1
Get Cloudy (1)	Business English (1)	\$7,000	9/23/2026	Approved	☒
Subtotal		\$7,000			1
Total		\$7,000			1
Test Student (1)	Salesforce Admin Course (1)	\$7,000	9/23/2026	Rejected	☒
Subtotal		\$7,000			1
Total		\$7,000			1
Total (3)		\$20,000			3

Milestone 12 – Dashboards:

Activity 1: Create “Student Management Dashboard”

Steps:

- Go to Dashboards → New Dashboard.
- Name = Student Management Dashboard.

- Select a folder → click Create.
- Save inside the chosen Dashboard folder.
- Add components:
 - Donut Chart → source = Students by Status report.
 - Bar Chart → source = Enrollments by Course report.
 - Gauge → source = Revenue Report – Fees Paid (sum of revenue field).
 - Table → source = Pending Enrollment Approvals report.
- Click Save → Dashboard is ready.

4. Arrange components on canvas.

Milestone 13 – Security Setup

Activity 1: Configure Profiles

- Go to Setup → Profiles.
- Click New Profile (or Clone from existing).
- Create required profiles:
 - Admin → Full access (all objects/permissions).
 - Enrollment Officer → Create/Update Enrollments__c records.
 - Instructor → Read-only access to assigned Enrollments__c.

- Enter Profile Name = Enrollment Officer.
- In Object Settings:
- Enrollment__c → Read, Create, Edit.
- Student__c → Read (add Edit if required).
- Course__c → Read (add Edit if required).
- Click Save.

- Go to Setup → Profiles → New (or Clone from existing).
- Enter Profile Name = Instructor.
- In Object Settings:
- Enrollment__c → Read-Only.
- (Optional) Student__c / Course__c → Read if you want Instructors to view related info.
- Click Save.

Activity 2: Create Permission Sets

- Go to Setup → Permission Sets → New.
- Create Custom Object Access → grant extra permissions for project-related custom objects (if needed).
- Create Dashboard Editor → enable Create/Customize Reports & Dashboards permissions.
- Assign each Permission Set to the relevant users (Admin, Enrollment Officer, Instructor, etc.).

Activity 3: Configure Sharing & OWD

- Go to Setup → Sharing Settings.
- Under Organization-Wide Defaults, set:
- Students (Student__c) → Public Read/Write
- Courses (Course__c) → Public Read/Write
- Enrollments (Enrollment__c) → Private
- Click Save.

For Instructor access to assigned Enrollments, optionally:

- On Enrollment__c, add a User Lookup field → label it Instructor User.
- Go to Setup → Flows → New Flow → choose Record-Triggered Flow.
- Object = Enrollment__c, Trigger = Created or Updated.
- Add Update Records element → set OwnerId = Enrollment__c.Instructor_User__c.
- Save Flow as Assign_Enrollment_Owner → Activate.

7. FUNCTIONAL & PERFORMANCE TESTING

During the functional and performance testing phase of the Student Enrollment & Course Management System (SECMS), screenshots were captured from the Salesforce user interface to validate that all implemented features worked correctly. These included the creation of student, course, instructor, and enrollment records, along with validation rule checks for mandatory fields, eligibility criteria, and enrollment constraints. Record type behavior was verified for different course categories, while flows were tested to confirm automated enrollment approvals and seat availability checks. Apex trigger functionality was also validated to ensure automatic confirmation and record updates. In addition, screenshots of generated reports and dashboards were documented to confirm accurate data visualization, enrollment tracking, and performance monitoring. All these screenshots serve as evidence of proper system functionality and efficiency during testing.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Automation of enrollment approvals and seat checks.
- Validation rules ensure data accuracy and enforce constraints.
- Apex triggers handle automatic confirmations and updates.
- Reports and dashboards provide real-time insights.
- Role-based profiles and permission sets improve security.
- Saves time and reduces manual errors.
- Centralized management of students, courses, and enrollments.

Disadvantages

- Requires technical expertise for setup and maintenance.
- Complex flows/triggers may increase system overhead.
- Customization dependency on administrators.
- Private sharing settings may restrict visibility without extra rules.
- Performance issues possible with large datasets if reports aren't optimized.
- User training needed to understand profiles, permissions, and dashboards.
- Initial configuration effort can be high.

9. Conclusion:

The Salesforce Student Enrollment & Course Management System (SECMS) has proven to be an effective solution for streamlining the entire academic lifecycle. From student registration and course creation to enrollment management, instructor assignment, approvals, revenue tracking, and reporting, the system integrates all processes into a unified platform. By leveraging Salesforce's automation tools—such as validation rules, flows, approval processes, and dashboards—SECMS enhances data accuracy, operational efficiency, and informed decision-making. This project demonstrates how manual academic processes can be transformed into a scalable, reliable, and user-friendly digital solution, ultimately improving both administrative control and the student experience.

10. FUTURE SCOPE

- Integration with Learning Management Systems (LMS) for seamless course delivery.
- Implementation of AI-based analytics to predict student performance and enrollment trends.
- Mobile app development for student and instructor access on the go.
- Enhanced self-service portals for students to manage registrations, payments, and approvals.
- Expansion of automation flows for advanced approval hierarchies and notifications.

11. Appendix

- Screenshots of functional testing (record creation, validation rules, flows, triggers)
- Screenshots of performance testing (reports, dashboards, refresh times).
- Report definitions (Pending Enrollment Approvals, Revenue Report – Fees Paid Students by Status, Enrollments by Course).
- Dashboard configuration (Student Management Dashboard with Donut, Bar, Gauge Table components).
- Profile setups (Admin, Enrollment Officer, Instructor).
- Permission Sets (Custom Object Access, Dashboard Editor).
- Sharing Settings (Organization-Wide Defaults for Students, Courses, Enrollments)
- Flow design for Instructor assignment (OwnerId update via Instructor User lookup)
- Validation rules list (mandatory fields, fees paid before approval, eligibility checks)
- Approval process configuration for Enrollment requests.
- Object schema (Student, Course, Instructor, Enrollment objects with relationships).
